# RIVER FLEET GETS NEW DIESEL SHIPS

MOSCOW SHIPYARD BUILDS NEW TYPE DIESELS -- Pravda, No 150, 30 May 49

Several Diesel tugboats are now under construction at the Moscow Shipyard and will soon be put into operation.

The shipyard has started building a new passenger, hydroplane-type, Diesel ship. The powerful engine and four air propellers enable the ship to develop high speed. For better maneuverability in the ports, when low speeds are necessary, an auxiliary water propeller is provided. The ship will have comfortable cabins for passengers.

Rechnoy Transport, No 44, 8 Jan 49

Workers of the Moscow Shipyard have pledged to save a sufficient amount of metal to build a 150-horsepower Diesel ship above plan.

The Moscow Shipyard recently completed five additional Diesel ships, fulfilling the second-quarter plan in one month. These ships will be sent by rail to the Vishniy Irtysh where they will be put into operation.

NEW PUMP DREDGE FOR DON RIVER -- Rechnoy Transport, No 46, 10 Jun 49

A steam-pump dredge, with a capacity of 150 cubic meters per hour, has been put out by a plant of the Main Administration of River Shipbuilding Industry. All of its main and auxiliary mechanisms, as well as its boiler, were produced by plants of the Ministry of River Fleet. After a series of tests, the dredge will be put into operation on the Doc River.
